Why National Vision?

NVC are aware that IT & Security systems are at the heart of any business transformation, and an agile organization must handle constant change. As an innovation driven, flexible company we will be your trusted partner for driving change and reaping the benefits from your investment in security systems and technology.

In today's market, most security solution customers are adopting more best-of-breed, purpose built technologies; The NVC can supply complete, end-to-end solutions for all types of security networks and technologies, relying solely on our own expertise, thus saving valuable time and energy. We specialize in building integrative solutions fusing these technologies. That is our unique added value.

Our consultants have track record delivering quality and value at the day-to-day level whilst our management team is committed to cost effective results and continuous upgrading and improvement in our own services and methodologies.

Applying technology successfully at organizations is our prime business. You too can benefit from our expertise and insights generated from our collective experience. We look forward to meeting you and discussing opportunities for cooperation. You can start a partnership with us any time.

The Smartest Guard Tour Monitoring System
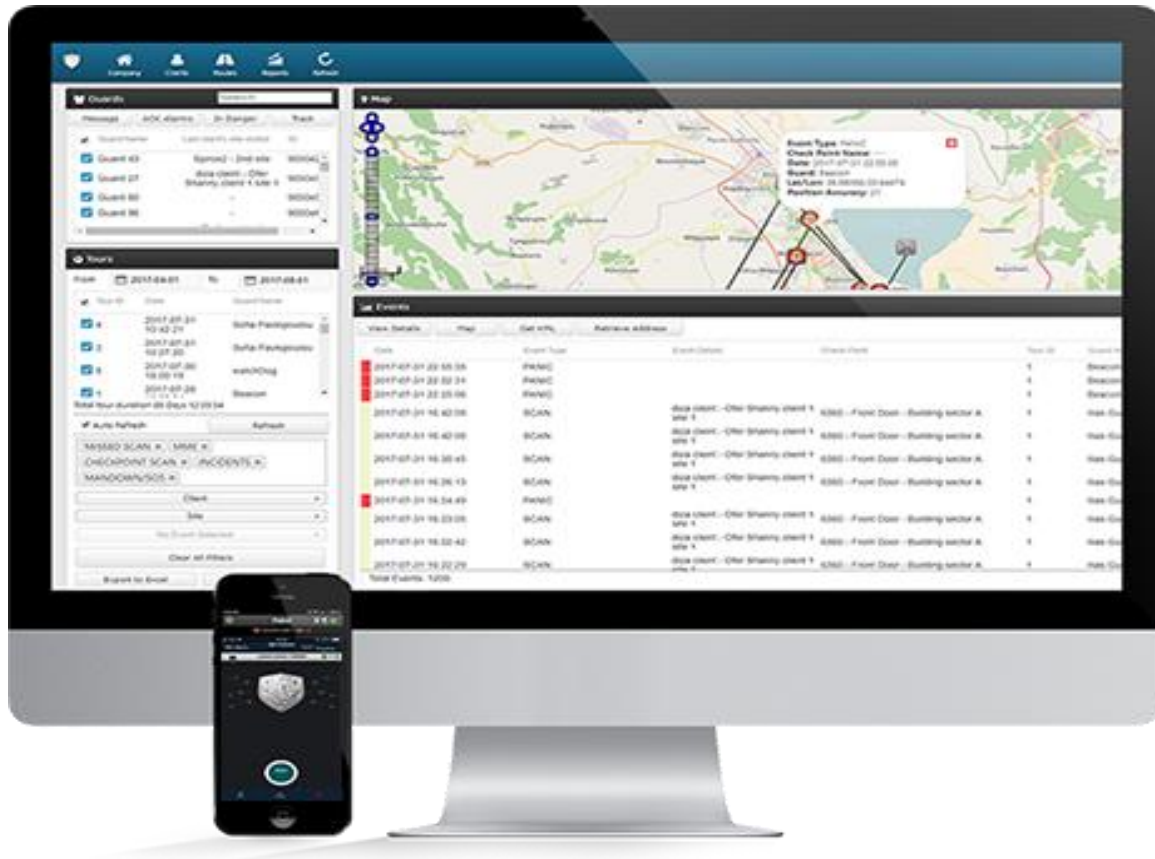

QR-Patrol is a Real Time guard monitoring system which skyrockets the efficiency of security companies and offers them the ability to upgrade their services via technology. In brief, QR-Patrol incorporates all the basic features of a smart guard tour system solution:

- Create and connect sites with checkpoints
- Receive SOS alerts and take immediate action
- Get e-mail notifications for missed checkpoints
- Send incidents reports to your clients or to the Monitoring Center
- Manage patrols remotely in real-time
- Verify guard tours online and check missed patrols
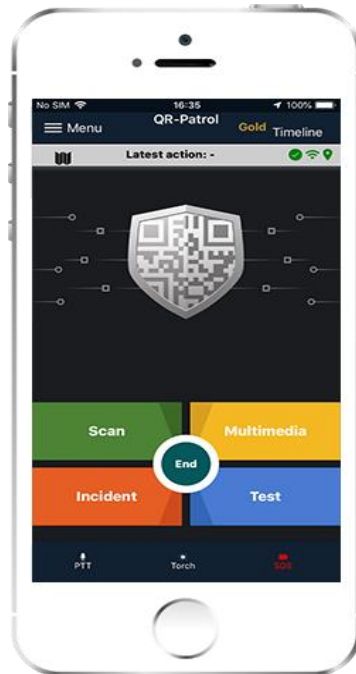

Incidents Report

Monitor incidents in real-time by gathering multimedia data (image, voice, detailed notes) with signature fields.

Guard Tour monitoring

Monitor your guards and manage your workflow in an efficient way, automating all internal work process.

Guards' schedules

Create guards' schedule templates and follow specific scheduling during the whole patrol monitoring activities.

Timekeeping

Automatic record of check in and check out in real-time giving the ability to track working hours and control budget.

Advanced Reporting

Create multiple reports (scanned, missed check points / incidents / patrol duration) using advanced filtering and export abilities (PDF, excel).

NFC / QR codes / Beacons

Scan NFC tags, QR codes, Beacons or Virtual checkpoints placed on buildings and territories and send immediate alerts and reports.

Electric Vehicles Charging

AVTECH Software Inc. (USA)

The Worldwide Leader In Making… Temperature & Environment Monitoring Easier

AVTECH Software Inc. (AVTECH), a private corporation since 1988, is the leading developer and manufacturer of real-time physical temperature and environment monitoring solutions for computer rooms, telecom and many other facilities. AVTECH's unique combination of in-house designed hardware and software offers easy-to-use monitoring, alerting and automatic corrective action capabilities that have made their products popular in 106 countries.

AVTECH products monitor many of the world's most secure data centers including those at the White House, Pentagon, United Nations, all branches of the U.S. government and military, all U.S. state governments, over 87% of Fortune 1000 and organizations of all types and sizes in almost every industry. Use is widespread in business, manufacturing, education, government, warehouse, cold storage, grow facilities, pharmaceutical, medical, food service and residential.

Axis is the market leader in network video and a driving force behind the shift from analog to digital video surveillance, which paves the way for a more secure, smarter and safer world. Offering network video solutions for professional installations, Axis' products and solutions are based on an innovative, open technology platform.

Axis has more than 1,000 dedicated employees in 40 locations around the world and cooperates with partners covering 179 countries. Founded in 1984, Axis is a Sweden-based IT company listed on NASDAQ OMX Stockholm under the ticker AXIS.

Axis retained its position as clear global market leader in network cameras and was ranked second in the video encoder supplier category. During the year, Axis received many international awards for its products and solutions in network video, including for cameras equipped with the so-called Light finder technology.

Axis was the first company in the world to launch a network camera in 1996, thereby initiating the shift from analog to digital technology. Today Axis offers the market's broadest product portfolio of network cameras, video encoders, software and accessories, and provides a unique global service to end customers in connection with installation and use of the products.

Video management system

Milestone is video surveillance software.
It is powerful and easy to use with a wide array of features for basic to advanced surveillance needs

Milestone Systems was founded in 1998 upon a dream to build a software development company that could improve business through managing and distributing digital video data regardless of time or location. Today, that dream is being realized as more and more security installations are moving toward digital technologies.

Milestone Systems is the world's leading provider of open platform IP video management software (VMS) and its XProtect VMS is used by more than 100,000 customers worldwide. XProtect is easy to use, yet powerful software that is designed with open architecture. This means that all XProtect products are compatible with more IP cameras, encoders and digital video recorders than any other VMS manufacturer, giving you the freedom to mix and match hardware to fit your needs and budget.

Because XProtect is based on a true open platform, you have the ability to integrate with today's best analytics and business solutions and to expand what is possible with future innovations.

Whether your installation is just a few cameras or several thousand, there is an XProtect product to meet your needs. Learn more about the different XProtect software products in the key features overview chart below and by visiting the product pages.

The Mission:
Milestone enables its customers to optimize their business processes by delivering an open and independent IP video surveillance software platform.

The Vision:
Milestone aims to drive the global convergence of video surveillance and IP-based business systems.

Milestone Values:
Reliability, Openness, Innovation, Flexibility and Independence reliability is a key parameter for success through dependability as hard-working professionals whom people can count on. Milestone strives to deliver high quality, dependable software, well tested, and proven in years of operation. Solid support is provided to each other, the partners and end customers.

FING@RTEC

TimeTec Holding ventured into the revolutionary biometrics technology at the beginning of the new millennium with specialization in workforce time attendance and office door access designed for a large array of industry. Having established a strong biometrics brand worldwide via FingerTec, TimeTec Holding embarks in exploring the next big thing in technology; Cloud, IoT and AI. Starting 2014, the Company has been introducing a variety of cloud solutions to provide convenience and efficacy to various companies around the world. TimeTec cloud brand focuses on workforce, security and smart residential solutions.

Uniview is the pioneer and leader of IP video surveillance.Firstly introduced IP video surveillance to China, Uniview now is the third largest player in video surveillance in China. In 2018, Uniview has the 4th largest global market share.

Uniview has complete IP video surveillance product lines including IP cameras, NVR, Encoder, Decoder, Storage, Client Software and app, covering diverse vertical markets including retail, building, industry, education, commercial, city surveillance etc.

Our aim is to become a global leader in video surveillance industry which endeavors to build a safer world by providing professional, reliable and cutting-edge products and services.

Expert in IP

Uniview started video surveillance early in 2005, and founded independently in 2011. Instead of choosing an easy way, Uniview started with IP video surveillance, who was the first manufacturer in China. Owning innovative R&D teams and industry-leading quality control ability, Uniview steptted into overseas market in 2014.
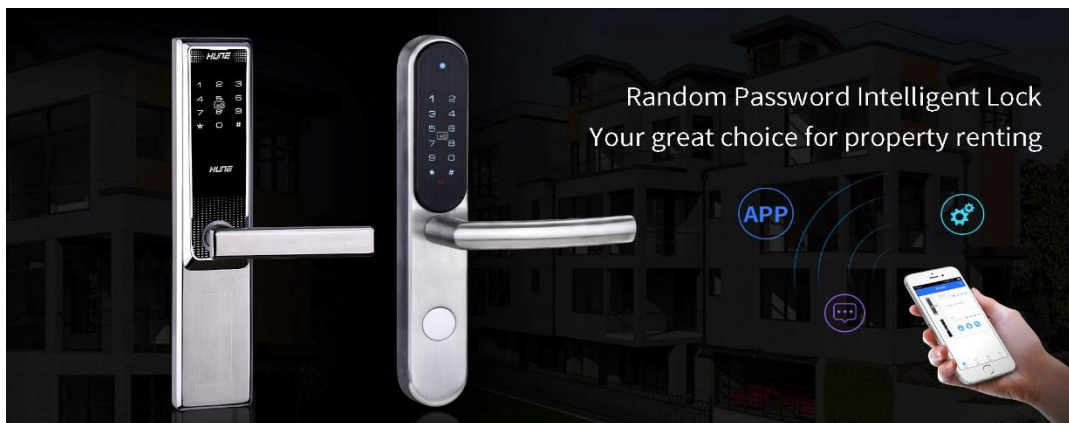

SMART LOCK

A Slight Touch for A Smart Life

HUNE have 27 years' experience in the **smart digital door lock factory**, has become the top 3 digital lock manufacturer and cabinet lock supplier in China and Hong Kong group have a production in China mainland. Such as **smart digital door lock factory**. Can offer hotel card lock, keypad lock, fingerprint lock, code door lock, Keyless entry door lock, biometric door lock.

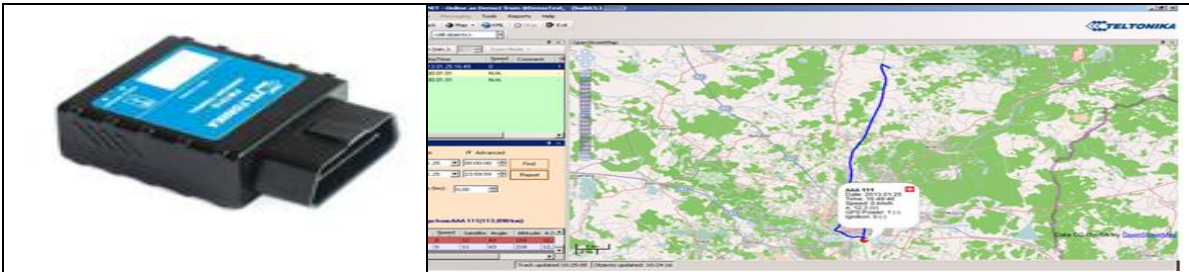

THE RIGHT SMART LOCKS FOR YOU

Smart home brings people a convenient and fast life, more and more people are full of expectations for intelligent life. Smart lock is different from the traditional mechanical lock. It is a combination of security, convenience, advanced technology lock. So where can the smart lock be applied?

Teltonika vision is to provide an added value for people and companies by creating electronically devices and solutions, which are based on the latest achievements of science and technology. We aim to help people to integrate the latest technologies in real life, what would bring more cosiness, comfort, freedom of mobility and security to their everyday life.

Fleet Control from any PC, iOS or Android running device

When do you need it?

- When You want to use Teltonika AVL without any installation
- When You want to see ALL applications possibilities (track, reports, driver information etc.) whether You use any PC or iOS/Android running device

Where is it possible to connect from?

- Personal Computer
- Android or iOS operating systems

TAVL Application Solution

- Easily monitor GPS information about objects (FM, GH and AT series) in one window
- See last position on the map when your GPS device was active with all extra information
- Track vehicle trip on particular time with graphical reports

NETWORK INFRASTRUCTURE

Network Infrastructure professional services enable National Vision Security Systems Co., to succeed in its overall mission by providing and managing the customer's core of information technology infrastructure and services, where we accomplish this by:
